AGRICULTURAL STATISTICS, IRELAND.

THE ESTIMATED AVERAGE PRODUCE OF THE CROPS;

AND

THE EMIGRATION FROM IRELAND

IN THE YEAR 1861.

TO HIS

EXCELLENCY GEORGE WILLIAM FREDERICK, EARL OF CARLISLE, K.G.,

&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

I had the honour to submit, on the 10th of August, 1861, a return showing the acreage of flax by Counties and Provinces; and on the 5th of September, General Abstracts of the extent under the various crops and the number of Live Stock in 1860 and 1861; also the Emigration from the several Ports of Ireland for the first seven months of the year 1861. I now beg to submit Tables compiled in this department, exhibiting the estimated average produce of the Crops in 1861, compared with that of the previous year.

The total number of Emigrants who left the country during the year ending 31st December, 1861, is also given, distinguishing the Ports whence they sailed, and the County from which they came; their sex and age are also given.

The information contained in the Tables relating to the Crops was procured, as on former occasions, by intelligent members of the Constabulary Force, who were specially selected for the purpose. The persons from whom the estimated average produce of the Crops per acre was obtained, were respectable farmers, and other parties known to be acquainted with the probable *average* yield per acre in each Electoral Division.

In order to obviate the difficulty arising from the variety of Weights and Measures in Ireland, the Enumerators were directed to state the yield per acre in Irish, Statute, or Cunningham Measure, whichever was best known to the farmers in the neighbourhood; and, with regard to Weights, to be particular to specify that in use in the locality; the name and address of the person from whom the information was received in each Electoral Division were also given in the Returns.

The rates of produce thus obtained by the Constabulary were then forwarded by me to the several Boards of Guardians in Ireland, to whose kind attention and courtesy I am indebted for having received revised returns for 2,555 Electoral Divisions, out of 3,438.

The Tables relating to the yield of the land, show by Counties and Provinces the entire area under Crops, the estimated *average* produce per Statute Acre, and the total yield. The produce of the cereal Crops is given in Quarters, Barrels, and Tons; and of Potatoes and Green Crops in Barrels and Tons.

A Table is also given showing the average yield of the Crops in 1847, and from 1849 to 1861 inclusive.

The estimated average produce per statute acre, 1861, was under that of any year since

1847. The area under Oats was less in 1861 than in any year from 1847 to 1856; since 1856, however, its extent has varied but little. Barley, Bere, and Rye, especially the two last-mentioned crops, have diminished considerably in the extent sown since 1847. Beans and Pease also show a decreased breadth during the period referred to. The area under Potatoes has increased considerably between 1847 and 1861—the tendency appearing to be, that as the acreage under Potatoes increases, that under Wheat, Barley, Bere, Rye, and Beans and Pease decreases. The extent under Turnips has fluctuated during the same period; but the breadth under this important crop seems, on the whole, to tend towards an increase. Mangel Wurzel, Cabbage, and Meadow, greatly increased in extent during the years referred to.

The total area under Wheat in 1861 was 401,243 acres, being 65,172 less than was grown in the previous year, the average rate of produce per statute acre was returned as 3¾ Barrels of 20 stones, giving a total yield of 851,871 quarters. This yield was one barrel per acre less than that returned in the previous year, which, together with the diminished area, caused a decrease in the yield of Wheat of 419,717 Quarters under the produce of 1860.

Oats occupied 1,999,160 acres, being an increase of 32,856 compared with the preceding year. The acreable produce was 6⅝ Barrels of 14 stones, being ⅝ of a Barrel less than the previous year. This Crop yielded 8,045,689 Quarters, being 796,235 less than the Crop of 1860.

Barley, Bere, and Rye, covered 210,537 acres, being 16,704 more than in 1860. The acreable yield of Barley was 6¼ Barrels of 16 stones; of Bere, 6⅜ Barrels of 16 stones; and Rye, 4⅘ Barrels of 20 stones. The total yield of these three Crops was 720,538 Quarters; being 71,716 less than in the former year. This decrease was caused by the difference in the yield per acre of 1⅘ Barrels of Barley, ⅕ Barrel of Bere, and ⅝ Barrel of Rye.

Potatoes had an area of 1,133,504 acres, being 38,575 less than was under them in the previous year. The acreable yield was 13⅛ Barrels of 20 stones, being 5¼ Barrels less than in 1860, which, with a diminished area, caused a total deficiency of 882,947 Tons.

There were 334,104 acres of Turnips, being 15,564 more than in 1860. The acreable yield was 10⅗ Tons; being 1⅘ Tons above that of the previous year. The total yield of the Crop was 3,392,884 Tons; being 764,906 more than in 1860.

Cabbage was grown on 30,020 acres; being 7,235 more than in the previous year. The acreable yield was estimated at 10⅜ Tons; being 2⅕ Tons more than in 1860. This Crop produced 310,907 Tons; being 122,196 more than in the preceding year.

The extent under Mangel Wurzel was 22,833 acres; being 9,153 less than in 1860. This Crop produced 235,638 Tons; being 54,603 under that of the previous year. The decrease was owing to a diminished area, as the acreable yield, 10⅕ Tons, was 1⅛ Tons above that of 1860.

There were 1,546,206 acres under Hay, being 48,312 less than in 1860. The acreable produce was returned as 1⅘ Tons, being one-fifth of a Ton under the produce of the previous year. The general yield, however, notwithstanding the decrease, was larger than in any year since 1847, with the exception of 1860.

Flax had an area of 147,957 acres, being 19,362 more than in 1860. The acreable yield was 24⅜ stones, being 5¼ stones less than in the previous year. The total produce was 22,568 Tons, being 1,192 Tons under that of 1860.

Table I.—The extent under each of the principal Crops in 1860 and 1861, and the increase or decrease in the latter year, is given in the following Table:—

Table II.—The estimated produce per statute acre in 1860 and 1861, and the increase or decrease in 1861, were as under:—

During the period from 1847 to 1861 the highest acreable yield of Wheat was returned for 1847 and 1854, and the lowest for 1850 and 1861. Of Oats, the highest acreable produce was in 1854 and 1847, and the lowest in 1859 and 1861. Barley had its greatest yield in 1853 and 1854, and its lowest in 1859 and 1861. Potatoes afforded the highest yield per acre in 1847 and 1853, and the lowest in 1860 and 1861. Turnips gave the highest yield in 1853 and 1855, and lowest in 1860. Hay gave its highest yield in the year 1852, when it was $2\frac{7}{10}$ tons to the acre, and its lowest in 1859, when it was 1^{5} tons to the acre. The yield of this crop was returned as 2 tons to the acre in 1849, 1850, 1851, 1853, 1855, and 1860.

Table III.—The total produce of the principal Crops grown in 1860 and 1861, and the increase or decrease in the latter year, were as follows:—

Comparing the average acreable yield of the Crops in 1861, according to the Returns received from the several Counties and Provinces, Dublin and Londonderry give the highest rate for wheat—6 Barrels,—and Galway the lowest—$2\frac{1}{2}$ Barrels per acre. Duhlin the highest for Oats—$9\frac{3}{4}$ Barrels,—and Clare the lowest—$4\frac{3}{4}$ Barrels.

Loudonderry gives the highest for Barley—$8\frac{3}{4}$ Barrels, and Longford the lowest—$2\frac{7}{10}$ Barrels.

Carlow stands highest in the yield of Potatoes, having $24\frac{3}{4}$ Barrels to the acre; and Clare the lowest, having only $7\frac{1}{2}$ Barrels.

Duhlin and Louth give the highest yield for Turnips, having 15 Tons; Clare the lowest, $5\frac{1}{4}$ Tons to the acre.

The County Duhlin is highest in Mangel Wurzel—15 Tons to the acre; and Limerick the lowest—$6\frac{1}{10}$.

The yield of Cabhage was greatest in Dublin, 18 Tons to the acre. In Wexford the yield was lowest, $5\frac{3}{4}$ Tons.

The acreable produce of Meadow was highest in the County Armagh, where it was $2\frac{8}{10}$ Tons; and lowest in Cork, $1\frac{1}{2}$ Tons.

Of the Provinces, Ulster gives the largest acreable yield of Wheat, Oats, Potatoes, Mangel Wurzel, and Hay. Leinster is highest in Barley, Bere, Rye, Turnips. Connaught gives the highest acreable yield of Cahbage.

As it is of importance to show *even approximately* the amount of Farm produce available for food in Ireland, a Table is given on the foregoing page, exhibiting the quantity of Corn, Beans, Pease, and Potatoes, produced in each County; also the *average* number of pounds of Corn, Beans, and Pease, and stones of Potatoes, to each family, according to the Census of 1861. It appears by the Returns that the last harvest, notwithstanding the general deficiency, yielded sufficient Corn, Beans, and Pease to supply 2,865 lbs. to each family, and that Potatoes produced *an average* of 263 stones for each family. These quantities are equal to 7·85 lbs. of Corn, Beans, and Pease, and 0·72 or nearly $\frac{3}{4}$ of a stone of Potatoes a-day to each family during one entire year.

The extent under each of the principal Crops, the estimated total produce, and the *average* yield per acre for all Ireland, in each year from 1851 to 1861, both inclusive, were as under:—

As the falling off in the yield of the Crops in 1861 may be chiefly attributed to the very unfavourable state of the weather, it will not be uninteresting to give an abstract of the Meteorological Observations taken at the Ordnance Survey Office, Phœnix Park, Dublin, with which I have been kindly furnished by Captain Wilkinson, R.E.

The mean temperature of the year was 49° 2′ Fahrenheit. The barometer stood highest during the year on the 2nd of February, at half-past nine o'clock, A.M., wind S.W., when it was 30·500 inches; and lowest on the 21st of the same month at half-past three in the afternoon, with the wind from the N.E., when it was 28 591 inches.

The highest temperature in air during the year was on the 14th June, when the thermometer registered 79° 9′; it was lowest on the 13th December, when it fell to 18°.

The greatest rain-fall in twenty-four hours was 1·026 inches on the 13th January, with the wind from the N.N.W. Rain fell on 182 days during the year, being about six months of rainy days. A quantity of rain sufficient to cover the whole surface of the country to a depth of two feet three inches fell during that period.

Within the Phœnix Park there fell 1,090,184,608 gallons, representing a weight of 4,866,895½ tons. The most prevailing winds were from the S.W., from which point it

blew 130 days, with an average pressure of 3·98 lbs. to the square foot. The weather was calm on 26 days only. The strongest wind came from the N.E. on the 9th February; its average pressure was 25 lbs. per square foot.

EMIGRATION FROM IRISH PORTS IN 1861.

The number of Emigrants who left Ireland during the year 1861, was 66,396, of whom 2,104 belonged to other countries. The total number of males was 33,953, of females 32,443. Compared with 1860 there was a general decrease of 21,230.

The province of Munster contributed 22,404, and Ulster 21,323 of the total numbers.

The following Table shows, comparatively with 1860, the Emigration from the several Provinces during 1861:—

CIRCULARS

AND

COPIES OF THE FORMS USED IN OBTAINING THE AVERAGE YIELD OF THE CROPS PER ACRE, FOR 1861.

Agricultural Statistics' Office,
5, Henrietta-street, Dublin,
1st November, 1861.

Sir,

You will receive herewith blank copies of "Form C," referred to in the "General Instructions" addressed to the Enumerators the 16th of last *May*, in order to enable you to procure Returns of the *Rates of Produce* of the various Crops grown in *each* of the *Electoral Divisions* mentioned in the enclosed List, which should be sent back to this Office with the Returns—in one file—when completed.

I beg you will be so good as to select for this service Enumerators known to you for their intelligence and acquaintance with the parties resident in the *Electoral Divisions* for which the Returns are required. Instructions as to the method of filling the Forms are printed on them. *Please direct the Enumerators to pay particular attention to these instructions.*

From the friendly co-operation and assistance which have been afforded to the Enumerators by all ranks and classes when collecting the Returns for this year, which show the acreage under the several Crops and the number of Live Stock, I confidently trust that by making inquiries from the resident Gentry, Clergy, and intelligent Farmers in the District, a valuable approximation to the *average* Rates of Produce per Acre of the various kinds of Grain, Potatoes, and other Crops grown in the several Electoral Divisions will be attained;—that being the object of this Return,—to which *accuracy, as far as possible*, can alone give any real value.

Your attention is particularly requested to this subject, in consequence of the increasing interest and importance now attached to Agricultural Statistics, and I trust you will be enabled to forward the Returns for your District to this Office before the 20th of November, in order that a General Abstract of the results may be compiled and submitted for the consideration of His Excellency the Lord Lieutenant.

It is my intention to solicit the assistance of the Boards of Guardians on this difficult question,—as in former years,—in order to procure their opinions as to the Rates of Produce in the several Electoral Divisions and Poor Law Unions in Ireland. This information will form a valuable auxiliary to that obtained through the Constabulary.

I am, Sir,
Your obedient servant,
William Donnelly, *Registrar-General.*

INSTRUCTIONS.

1. In filling in the Rate of Produce, the *yield* will be stated per *Irish* and also per *English* or *Statute* Acre, for *each* Crop, *and the Enumerator will be particular to enter the Rate in the Weight or Measure used in the locality*, as directed by the note at the head of the Form. It is particularly to be borne in mind that the average yield per Acre is for the *entire* Electoral Division—not for any individual Farm or portion of the Electoral Division.

2. One Form will be filled by the Enumerator for *each Electoral Division*, as per List furnished to the Sub-Inspector.

3. The information as to the probable yield of the Electoral Division for which the Return is made, should be procured from intelligent Landholders of the District, whose Names and Addresses will be stated in the column left for that purpose.

Agricultural Statistics' Office.
5, Henrietta-street, Dublin,
GENTLEMEN, *3rd December*, 1861.

I take the liberty of enclosing copies of Returns showing the *estimated average produce* by the *English*, and also by the *Irish* Acre, of the various crops grown in 1861, within each Electoral Division of the Union of in order to procure from the Guardians their opinion as to whether the AVERAGE PRODUCE per Acre,—obtained by the Enumerators from resident Landholders,—fairly represents the yield of the respective crops.

In case the Guardian signing the Return considers any *rate* entered upon it, to be *above* or *below* what it should be, columns are provided in which to insert the *corrected rate*.

As these Forms may be filled without much trouble, I shall feel much obliged if the Guardians will be so good as to favour me with their opinion respecting the produce of the various crops in their Union, and thus aid in increasing the value of these Returns, which are of so much general importance to the community.

May I request you will be so good as to give directions to the Clerk of your Board to *return these Forms to me as soon as possible*, as they are required to assist in compiling for publication the Table of estimated average produce of the Crops in 1861.

In case it is inconvenient to obtain the signature of an Ex-Officio or Elected Guardian, particularly connected with any Electoral Division, the signature of any other Guardian acquainted with the District, will be sufficient;—or, if these *rates of produce* are discussed and decided upon at a Meeting of the Board, the signature of the Chairman, or of the Clerk, with his approbation, will answer the purpose.

I take this opportunity of expressing my obligations to the many Guardians who were so kind as to assist me in the revision of the Returns of Produce in 1860, and I trust that, on public grounds, I may be excused for soliciting the opinion of your Board on this subject.

Communications to this Office NEED NOT be prepaid.

I am, Gentlemen, your faithful servant,

WILLIAM DONNELLY, *Registrar-General.*
